

# TalkMate Documentation

## Menu Page

→ Setting up the Microphone to be used in the app during the session (allows you to talk to your assistant afterwards)

→ Configuring the Synthetic Voice you want, if you don't have all Narrator voices available, please look at the ReadMe in the "Configuration Synthetic Voices" section, and follow the steps to add more Windows Narrator voices in your app

→ In the "For developer only" tab, the Templates Settings button allows you to modify the system instruction of your Ollama templates locally, the Quantize Templates button allows you to quantize (i.e. reduce, compressed) using Docker a template and finally the Publish Templates button allows via Ollama's API to publish your template to Ollama, for each button, you need to follow the steps in the terminal

## **Assistant Page**

→ You can choose one of your templates that you have previously uploaded to Ollama and or modified locally

→ Then you have your conversation history which allows you to choose a conversation and or create a new one by clicking on the New button

→ There are 2 possible discussion modes here, namely the Continuous Discussion mode which allows you to continuously chat with your model without having to press a button again and the Discussion Mode which allows you to speak once and have the response of the synthetic voice once and each time you have to press again to talk with the model again

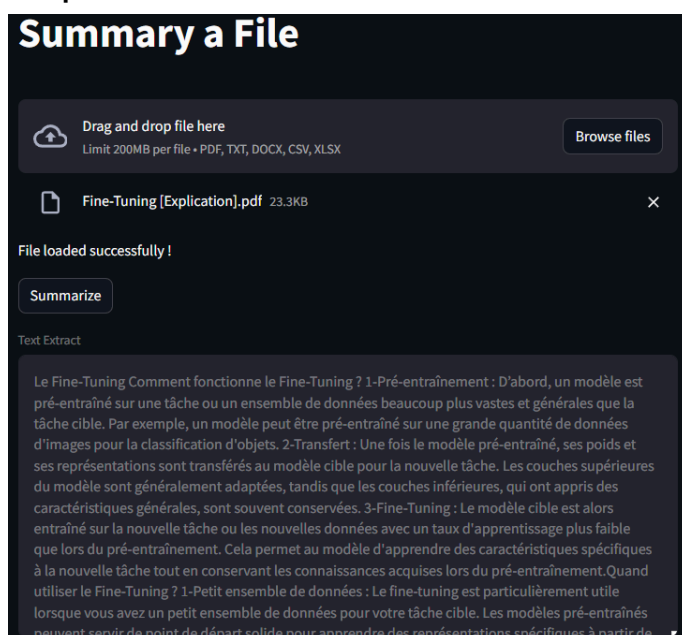

## Summarize Page

→ You can Upload a file to summarize it

This will extract the text and then use a universal summary template that will be used to summarize your document as best as possible

→ You can customize your summary via the Advanced Properties where you will find a list of properties to modify according to your needs:

- Choose the maximum length of the abstract
- Choose the minimum length of the abstract
- The size of the lot
- The top\_k and top\_p which are explained via the Info button just below

Advanced Properties

Maximum Length of summary

100

50 300

Minimum Length of summary

30

5 100

Batch size

4 - +

top\_k

10

5 200

top\_p

0,40 - +

Info

→ You have your Audio Mode which allows you to speak via the synthetic voice to read you the text that has been summarized to you

☐ Audio Mode

## QA Document Page

→ You can upload a file that allows you to speak later via an LLM on your upload document

→ You can choose the local template you want to use and the embedding template you want

→ You then have your conversation history as for the Wizard page but here you will find your discussions only from your QA Document page & You have your discussion mode which allows you after putting a document to speak once by clicking on the button to ask your question about the document provided

## Question Page

→ You must choose your LLM model and your local embedding model as for the QA Document page

Models

Please choose a model

Embeddings Models

Please choose an embedding model

→ If you haven't created a profile, you need to create one by entering the name of the new profile and pressing the create button

Select a profil

Enter the name of the new profile

test

Create

→ You will have your conversation history which will show only your conversations in this page and will put the name of your profile between [] to tell you the profile you used during the conversation

Conversation history files

[aeronautique] quoi ...

## **Additional Information**

→ Each conversation history, if you select a file it will automatically offer you other settings such as renaming the name of the saved conversation, downloading to CSV and finally deleting the conversation

The screenshot shows a mobile application interface with a dark theme. At the top, the text "Conversation history file" is displayed. Below it is a dropdown menu with the text "comment fonctio..." and a downward arrow. Underneath the dropdown is a label "New name" followed by an empty text input field. Below the input field is a yellow message box with the text "Please enter a file name." At the bottom of the interface are two buttons: "Download CSV" and "Delete".
